Professional Experience

Sr. Product Owner / Functional System Architect

American Electric Power (AEP)

February 2023 – Present

- Own and drive the product vision, strategy, and backlog for Oracle CCS enterprise cloud services, aligning priorities with operational goals, compliance requirements, and user needs across a complex regulated environment.
- Lead all Agile ceremonies, sprint planning, daily standups, sprint reviews, and retrospectives for a cross-functional team of developers, architects, and business stakeholders.
- Architect and implement system configurations and integrations that measurably improve platform performance, reliability, and user satisfaction across enterprise deployments.

- Built SQL-based analytics tools that reduced issue resolution time by 30%, delivering tangible efficiency gains across operations teams.
- Partner with audit, UAT, and compliance teams to maintain regulatory standards and quality benchmarks across all product releases.
- Bridge strategy and execution, equally comfortable defining product direction and contributing directly to technical solutions when needed.
- Champion a culture of ownership, continuous improvement, and accountability across product and engineering teams.

Distribution Dispatcher & Energy Control Lead

American Electric Power (AEP)

December 2018 – February 2023

- Managed real-time energy distribution operations across multiple grids, applying risk-based frameworks to ensure safety, reliability, and service continuity.
- Designed and implemented contingency protocols that reduced outage response time by 18%, improving grid resilience and customer outcomes.
- Coordinated field crew operations with GIS systems and restoration workflows across service territories.
- Maintained a zero-incident safety record across all dispatched field operations throughout tenure.

Compliance and Data Quality Analyst

American Electric Power (AEP)

April 2017 – December 2018

- Automated compliance reporting with Excel VBA tools, reducing manual processing time by 40% and improving data accuracy across regulatory submissions.
- Built SQL databases supporting regulatory tracking, audit preparation, and enterprise data quality management.
- Authored technical documentation and compliance communications distributed to 200+ field personnel.

Portfolio Manager & Agency Owner

Cardinal Estates LLC / ANFF Insurance Company

January 2015 – February 2018

- Managed investment strategy, financial operations, and project execution across a 10+ property real estate portfolio; delivered ROI analysis and risk modeling to optimize capital allocation and renovation returns.

- Founded and operated an independent insurance agency end-to-end — managing client development, underwriting protocols, regulatory compliance, and full business operations.
